

**PLUG  
& PLAY**

**MADE IN  
GERMANY**

Music mixing is no longer just reserved for professional DJs. The POKKETMIXER is the first mobile mini DJ mixer for everybody. It's easy to use and – since it needs no power supply – it's very versatile. The handy POKKETMIXER is easy to wire up and is ready in just 30 seconds. So anyone can easily and spontaneously be a DJ anywhere and at anytime.

## MAIN FUNCTIONS

Cross fading between two stereo audio signals (headphones signals), preview listen and EQ.

With the crossfader you can fade from one song to the other. With the „Listen“ switch the music can be heard from either device through your headphones. An equalizer can be switched on to change low, mid and high frequency of the left or right player.

## FEATURES

### Set-up: Quick and Easy

Just plug in two players, connect the music system and the dance floor is ready.

### Transport: Easy

The small, light unit weighs just 130 g; needs no power supply unit, no unnecessary multiple sockets or extra connection cables.

### Use: extremely flexible

For example indoors or outdoors, just connect your POKKETMIXER to a battery-operated boombox – at home, in a bar, in the park, at the beach, in the car, camper or on a boat.

### Two in, one out – it couldn't be easier

Two signals go in, one signal comes out. With the standard 3.5 mm stereo plug, two players are docked (eg MP3 player, mobile phone, notebook, iPad, PC or Discman) and one system plays your music (eg, stereo system or boom box).

## A mobile device for headphone signals

The POKKETMIXER does not replace the professional DJ mixer console. It is intended solely for headphone signals and thus perfect for mobile devices or PCs.

## A patented idea: Made in Germany, Berlin

The electronic circuitry that enables a DJ mixer console is solved innovatively and passively with the unique POKKETMIXER design – no power supply is needed!
